

Name: _____ Date: _____ Period + Teacher: _____

Meet Your Watershed

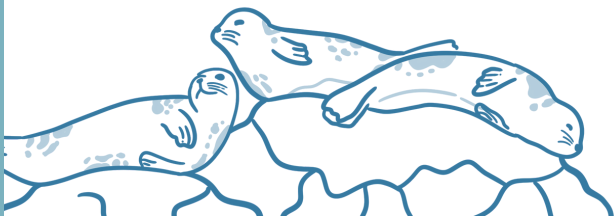

Warm up challenge (before the activity):

Please write anything you can think of to answer the questions in the table below:

Topic	What do I already know?
Describe a watershed in your own words	
What is a mountain or hill near where I live?	
What is the name of a river near where I live?	
What is the closest body of salt water near where I live?	
What is the source of the water that comes out of my faucet?	
What is nonpoint source pollution?	
What are three types of pollution that can get into the watershed?	
What are three actions that I can take to keep pollution out of the watershed?	
Why would I want to help keep my watershed clean?	

Class Activities:

Watch "Meet Your Watershed Video" and Play "Stormwater Action Game"

Please complete after watching the Meet Your Watershed Video:

Topic	What do I already know?
Describe a watershed in your own words	
What is a mountain or hill near where I live?	
What is the name of a river near where I live?	
What is the closest body of salt water near where I live?	
What is the source of the water that comes out of my faucet?	
What is nonpoint source pollution?	
What are three types of pollution that can get into the watershed?	
What are three actions that I can take to keep pollution out of the watershed?	
Why would I want to help keep my watershed clean?	

Reflection (please complete after playing the *Watershed Heroes Action Game*):

What is the most surprising thing that you learned today?	
How has this activity updated your understanding about watersheds?	
Would you be interested in being a watershed protector? If so, what action(s) might you like to take?
